

Airline Ground Support Equipment GSE Fleet Maintenance Programs

DAIFUKU
ELITE LINE SERVICES

ELS Ground Support Equipment programs provide comprehensive maintenance solutions for all types, ages and manufactures of both motorized and non-motorized units. Each operation is designed to proactively improve the life-cycle costs of some of the most critical assets at your terminal by ensuring you realise the optimum long-term return on investment and high levels of equipment availability that is critical in challenging today's highly competitive marketplace.

We understand that each piece of GSE will make the difference in achieving on-time departures. Our senior technicians come with an airline background and have years of experience in the fast paced GSE industry. Whether it is a maintenance program that meets airline specific standards or one that is designed to minimize down time while keeping operating costs under control, each GSE airport operation is customized to the specific customer's needs, so that our service efficiently meets each airlines high utilization operational environment.

ELS has taken the lead in GSE maintenance by establishing a Process-Based-Quality-System that is aligned with our ISO Certification. Our management approach is result oriented and focused in delivering better than bargained for service. ELS's commitment to improving the management and efficiency of our programs, while our fully committed technical staff meets each customers every requirement, has resulted in the highest customer satisfaction ratings in the industry.
